

Anna González-Neira studied at the Universidad Complutense de Madrid, where she was graduated in Biology in 1995. She received her Ph.D. in Medical Sciences from Universidad de Compostela in 2000 (Thesis Prize). During her PhD period she was a Research Fellow at the Office of the Chief Medical Examiner, Department of Forensic Biology, New York University Medical Centre and at the Institute of Pathology and Molecular Immunology (IPATIMUP) in Portugal. She did her postdoctoral research at the Unit of Evolutionary Biology, Universidad Pompeu Fabra in Barcelona. She has also held fellowships at the Wellcome Trust Sanger Institute, Cambridge (UK). She later moved to Oxford (UK) to work at the Department of Bioinformatics and Statistical Genetics, Wellcome Centre of Human Genetics. She joined the CNIO in September 2004 to head the Human Genotyping Unit. Over the last years her research activity has been focused on the identification of genetic factors influencing drug efficacy and toxicity of anticancer drugs.
