

Motivation Letter

In my opinion, the creation of the EPMA working group of young scientists (EPMA-YPS) is one of the key steps in the development of the association. This is no doubt that this will enable EPMA to distribute PPPM-based ideas among students, graduate students, and (medical/scientific?) interns.

As a scientist, it is both an honour and a huge opportunity for me to be able to communicate with world-class scientists from all over the world and young EPMA-YPS members. I look forward to contributing to the goals of the EPMA-YPS and participating in promoting PPPM.

Thank you for introducing me to the Working Group!

Maxim Sautin
